

# Clarification & Transparency Document – Quazenthor (QWBQ)

Educational BEP-20 Reference Token on BNB Smart Chain

## Why This Token Exists:

Quazenthor (QWBQ) is a minimal, fixed-supply BEP-20 token deployed on BNB Smart Chain mainnet to serve as a transparent, real-world reference implementation for educational and technical purposes.

Its primary purpose is to enable practical, on-chain observation of standard BEP-20 behavior in a live network environment — including transfers, approvals, allowance management, event emission, and gradual holder distribution changes.

The token demonstrates how an immutable, standard-compliant contract operates under real mainnet conditions (gas usage, transaction finality, permanent ledger records).

## Key Facts:

The contract is immutable: no minting, no burning, no taxation, no upgradeability, no privileged functions.

Total supply permanently fixed at 5,000,000,000,000 QWBQ.

Tokens are distributed manually upon educational request only — fully visible on-chain.

No ICO, presale, public sale, liquidity pool, or exchange listing exists.

Project has no corporate structure, no legal entity, no investors, no financial operations.

## Who Benefits:

Students learning smart contract fundamentals

Developers studying BEP-20 mechanics

Researchers analyzing immutable on-chain behavior

Technical reviewers examining minimal token implementations

## Official Verification:

Contract Address: 0x013f5f2F7F5b027012415A783ac2ed69EF936aE8

Verified on BscScan: January 31, 2026 (exact source code match)

Ownership Verification: Signature ID #15181 – Deployer:  
0x0daeb75bf06b879164d0753fa9d695763fcd1f49

## Risk Disclosure:

Interacting with blockchain involves risks (smart contract issues, network conditions, user error, potential fund loss). This project assumes no responsibility or liability.
